# PACKAGING THAT PUTS THE PLANET FIRST

Packaging Made From Plants

Responsibly Sourced & Manufactured

Certified Compostable

100% Carbon Neutral

We create compostable packaging solutions for a circular economy where there is no waste. It starts with responsibly sourced materials, continues with environmentally certified manufacturing processes, and ends with disposal options that see resources reused or regenerated.

**Compost Service**  
p.3

**Hot Cups**  
p.6

**Cold Cups & Straws**  
p.14

**Takeaway Containers**  
p.18

**Produce Trays**  
p.31

**Cutlery & Napkins**  
p.32

**Bags & Gloves**  
p.36

**Retail Range**  
p.38

# GO CIRCULAR

The traditional economic model is linear and can be simplified as having three basic stages: take, make and waste. BioPak has a commitment to disrupt this outdated model and to invest in a waste-free future – where innovative design and corporate responsibility intersect to create a circular, and regenerative economy.

## Plant-Based Raw Materials

Our plant-based products are designed to minimise the impact on our environment at each stage of their life cycle, by using materials that are both sustainably sourced and rapidly renewable. The footprint of these renewable materials is significantly smaller than that of traditional plastics derived from fossil resources – Ingeo™ bioplastic, for instance, has a footprint up to 80% lower.

Sugarcane Fibre

Sustainably Sourced Paper

PLA Bioplastic

## The End is Just the Beginning

Our products are designed to turn into compost – a new, valuable and locally produced resource at the end of their useful life. A thin layer of compost can mitigate climate change by improving the soil's ability to stabilise carbon and by increasing plant growth, which pulls more carbon dioxide out of the atmosphere.

## Ethical Supply Chain

Independent, third party certifications matter. We comply with ISO Environmental Standard, corporate social accreditations like Sedex, and certify our ranges either home and/or industrially compostable.

**Industrially Compostable**

**Home Compostable**

**Corporate Social Accreditation**

**ISO 14000 Environmental Standards**

## Compostable Solution

Did you know that the methane gas emitted from food in landfill is the third largest contributor to climate change?

Compostable packaging can help divert food scraps from landfill, avoiding harmful greenhouse gas emissions. Both food waste and compostable packaging can go in the same bin to be turned into nutrient-rich compost. There are a growing number of residential compost collections across Australia and New Zealand.

## How Can Your Business Start Composting?

Food and drink residue makes paper and plastic recycling an impractical disposal solution for the foodservice industry, but it's not a problem for composting.

Compost Connect is a brand-agnostic and independent platform connecting the existing organics recycling infrastructure to our community of forward-thinking businesses who are pioneering sustainability and leading the war on waste.

### Step 1

Find Your Local Composter

### Step 2

Sign Up Starts From \$5/Week

### Step 3

# GOOD FOR THE PLANET, GOOD FOR BUSINESS

Same Day  
Delivery

Carbon Neutral  
Business

Profit for Purpose  
Business

Compostable packaging isn't just good for the future of the planet, it's good for business, too. At BioPak, we offer quality, sustainable products with unbeatable customer service. Our automated processes and economies of scale mean you will never run out of stock and always receive the best price.

As a certified B Corp, we have worked to create a business that values people, the planet and profit. That is why we have been carbon neutral since 2010, and give back 5% of our profits to the community and the environment.

## Supporting Positive Change

### Compost Connect

To find your local composter, visit government-funded, not-for-profit, [compostconnect.org](http://compostconnect.org) proudly supported by BioPak.

**“Composting has been surprisingly simple. The team is all really supportive and the customer response has been great, many local customers bring their cups back to put in our composting bins. And better yet – it has actually **SAVED** us money!”**

Saint John Espresso, Sydney

### Give Back Fund

As a profit for purpose business, we are driven to preserve and protect the environment and give back to the communities we live in. That is why we donate 5% of our profits to positive change via our charity partnerships.

We are passionate about forest protection and restoration, and donate 1% of profits as part of this fund to support Rainforest Rescue in Australia and Green Fleet in New Zealand. Together with our customers, we have helped plant 22,777 trees and fund the purchase of 5 hectares of endangered rainforest.

# CUP LIDS & ACCESSORIES

Our cup lids are designed specifically for BioCups, providing a leak-free secure fit every time.

## BioCup Lids

We offer home compostable sugarcane lids, commercially compostable bioplastic PLA lids and recyclable plastic PS lids.

## BioCup Trays

2 & 4-cup trays, made from 100% post-consumer recycled paper.

## BioCup Sleeves

Paper sleeves made from sustainably sourced FSC™-certified paper.

## Stirrers & Teaspoons

Available in traditional plastic alternatives such as PLA and FSC™-certified birchwood.

# TAKEAWAY PACKAGING JUST GOT BETTER

## Clear Bowls & Lids

Clear bowls made from plant-based Ingeo™ bioplastic. Certified industrially compostable.

## Paper Bowls & Cups

Hot bowls made with paper from managed plantations and lined with Ingeo™ – an industrially compostable plant-based lining.

## Sugarcane Takeaways, Plates, Trays & Bowls

Made from rapidly renewable sugarcane fibre that is certified home and industrially compostable.

## Sushi Boxes & Lids

Industrially compostable sushi boxes have an Ingeo™ bioplastic lid with sugarcane fibre base.

## BioBoard Corrugated Boxes & Trays

FSC™ certified paper board products perfect for hot food.

## BioBoard Boxes & Wrap Wedges

FSC™ certified paper lunch boxes and wrap wedges. Perfect for the grab'n go market.

## BioBoard Catering Trays Bases & Lids

Unlined FSC™ certified paper board trays and lids that are perfect for presenting and transporting catered food.

	PET Lids (Takeaway Lids)	Polyethylene terephthalate		✓	Can handle warm foods		

# KNOW YOUR BIOPAK PACKAGING SYMBOLS

## Disposal

### Compostable

These symbols identify packaging that is independently certified as either home or industrially compostable. Industrially compostable certified products will disintegrate within 84 days and biodegrade within 180 days in industrial composting conditions. Certified home compostable products will biodegrade within 365 days in home composting conditions. We list the certification standards and our unique certificate number.

### Recyclable

This packaging can be recycled through kerbside recycling collection – just make sure it's rinsed clean and free from grease and oil.

## Product Materials

### Responsibly Sourced Paper and Wood

We only use raw materials from responsibly managed plantations, including FSC™ certified plantations, to ensure our forests are protected forever.

### Bioplastic/ Polylactic Acid (PLA)

Our plant-based bioplastic packaging is either home or industrially compostable and has a lower carbon footprint than conventional plastic packaging. It is not recyclable with conventional non-compostable plastics.

### Sugarcane Fibre/ Bagasse

Our sugarcane fibre packaging is made from sugarcane fibre (also known as bagasse), a by-product of the sugar refining industry. Sugarcane fibre packaging can be recycled in the cardboard recycling stream if not contaminated with food.

### Conventional Plastic

We're in the process of phasing out all non-compostable plastic items. This type of plastic is well-marked so you can identify whether they're kerbside recyclable – they are **not** compostable.

## Product Features

### Customisable

Our experienced design team is here to assist with custom branding or bespoke mould sugarcane fibre solutions.

### Hot or Cold Use

Our hot food friendly packaging is grease-proof and sturdy, and will retain its structural integrity whilst holding hot food. Our clear bioplastic cups and bowls are cold use only.

### Microwave and Oven Safe

We have noted which packaging is microwave and/or oven safe. Our sugarcane takeaway range can go in the oven at temperatures of up to 220°C for a maximum duration of 20 minutes.

### Freezer Safe

This symbol means the packaging is safe to use in the freezer, however, the structural integrity will vary depending on the food contained when frozen and thawed. We can supply samples for you to conduct testing.
